In order to become a **team**—a group of people working **interdependently** to achieve a **common goal** for which members are held **mutually accountable**—you must establish a specific and measurable performance goal. The SMART acronym helps teams in PLCs establish goals linked to gains in student achievement.

SMART goals: Goals that are **Strategic** and **Specific**, **Measurable**, **Attainable**, **Results-oriented**, and **Time-bound** (O'Neill & Conzemius, 2005)

TIPS for Establishing Smart Goals:

1. *Ensure your teams goals is aligned with the broader, overarching school-wide goal(s).*
2. *Clarify the level of achievement students were able to attain in the previous year.*
3. *Set a SMART goal that challenges your team to improve upon last year's performance.*
