I know this because 6 plus 2 equals 8. <math>6 + 2 = 8</math></p>							
<p style="text-align: center;"><u>Making 10 and Decomposing a Number</u></p> <p>I know that 8 plus 2 is 10, so I broke up (decomposed) the 7 up into a 2 and a 5. First I added 8 and 2 to get 10, and then added the 5 to get 15.</p> <p style="text-align: center;"><math>7 = 2 + 5</math>  <math>8 + 2 = 10</math>  <math>10 + 5 = 15</math></p>	<p style="text-align: center;"><u>Creating an Easier Problem with Known Sums</u></p> <p>I broke up (decomposed) 8 into 7 and 1. I know that 7 and 7 is 14. I added 1 more to get 15.</p> <p style="text-align: center;"><math>8 = 7 + 1</math>  <math>7 + 7 = 14</math>  <math>14 + 1 = 15</math></p>							
<p style="text-align: center;"><u>Back Down Through Ten</u></p> <p>I know that 14 minus 4 is 10. So, I broke the 6 up into a 4 and a 2. 14 minus 4 is 10. Then I took away 2 more to get 8.</p> <p style="text-align: center;"><math>6 = 4 + 2</math>  <math>14 - 4 = 10</math>  <math>10 - 2 = 8</math></p>	<p style="text-align: center;"><u>Relationship between Addition &amp; Subtraction</u></p> <p>I thought, '6 and what makes 14?'. I know that 6 plus 6 is 12 and two more is 14. That's 8 altogether. So, that means that 14 minus 6 is 8.</p> <p style="text-align: center;"><math>6 + 8 = 14</math>  <math>14 - 6 = 8</math></p>							
Score 2.0	<p>There are no major errors or omissions regarding the simpler details and processes as the student:</p> <ul style="list-style-type: none"> <li>• recognizes or recalls specific terminology, such as: <i>decompose, bundling, sum, difference, fact families</i></li> <li>• performs basic processes, such as: <ul style="list-style-type: none"> <li>• <i>find the sum of double facts</i></li> <li>• <i>decompose numbers into math facts</i></li> </ul> </li> </ul> <p>However, the student exhibits major errors or omissions regarding the more complex ideas and processes.</p>	<ul style="list-style-type: none"> <li>• <i>Using manipulatives, have students decompose a number and provide a math fact (e.g. <math>14 = 10 + 4</math>)</i></li> <li>• <i>Double facts fluency</i></li> </ul>						
Score 1.0	With help, a partial understanding of some of the simpler details and processes and some of the more complex ideas and processes.
